

Study board conclusions of the semester and teaching evaluation report

Year:	2019
Campus	Aalborg
Semester	MED8A
Coordinator:	Martin Kraus
Date:	06.11.2019

This document represents the public version of the evaluation of the semester. The document forms together with the semester and teaching evaluation report the basis of any adjustments to the semester's description, planning, execution and/or evaluation of the next iteration of the semester and are used by the coming semester coordinator and semester planning group.

The document also represents the study board's response to the students, teachers, coordinators and other interested parties about possible consequences of conditions that the students of the semester have pointed out.

The public conclusions and recommendations of the semester coordinator

Overall, the semester went very well with the exception of the miniproject description in the course "Embodied Interaction" which led to most students not qualifying for the first exam attempt. This should be easy to fix by the lecturer in future iterations of the course. It is noteworthy that some of the project groups are successfully publishing scientific articles about their semester project.

Conclusion of the study board

The Study Board (MSN) has processed the semester evaluation report and offers the following observations/conclusions:

- Student survey response rate: 4/35. This is appallingly bad. Please note that it is the responsibility of the coordinator for the subsequent semester to ensure that students take the survey regarding the previous semester
- Overall the semester appears to have run successfully
