

### Study board conclusions of the semester and teaching evaluation report

Year:	2023
Campus	Copenhagen
Semester	LID7
Coordinator:	Mihkel Pajuste, Morteza Hosseini
Date:	April 3 <sup>rd</sup> , 2024

This document represents the public version of the evaluation of the semester. The document forms together with the semester and teaching evaluation report the basis of any adjustments to the semester's description, planning, execution and/or evaluation of the next iteration of the semester and are used by the coming semester coordinator and semester planning group.

The document also represents the study board's response to the students, teachers, coordinators and other interested parties about possible consequences of conditions that the students of the semester have pointed out.

### The public conclusions and recommendations of the semester coordinator

In general, a successful semester

#### Light & Space

The course was well appreciated, was considered as a very well-structured course. It would be nice to put more time for questions and discussions during the lecture. Assignments can be more scalable to challenge the students.

#### Lighting Fundamentals

Feedback was positive. Things can be further improved by employing more structured exercises, more time for two-way communications and exemplification and hands-on training.

#### Rendered Light Simulation

It was appreciated, but also was found challenging regarding how they can use it in the semester project because of teaching several software. Request for having access to license and university computers.

### Conclusion of the study board

The Study Board (MSN) has processed the semester evaluation report and offers the following observations/conclusions:

- 10 out of 26 replied the Survey
- the semester went fine
- the grades look fine
- the outcome of the responses regarding cooperation within the project group could be better
