## 4 CATEGORIES

that will help you understand the job ad:

<b>WHAT</b>	Tasks and methods Professional competencies Experience and education
<b>HOW</b>	Personal competencies Personal values Motivation
<b>WHO</b>	Target group
<b>WHERE</b>	Company culture Colleagues Values

Find important **THEMES** in the job ad:

- Passionate about electronics engineering
- Designing, testing, and implementing
- Development of electronics on a module and system level, as well as software for embedded electronics and user interfaces
- Completing tasks accurately and correct
- Self-motivated and work in a fast-paced environment

### MacArtney Denmark seeks: **Electronics Engineer**

Do you want to be part of a global organisation in Esbjerg? Are you **passionate about electronics engineering**? Does it motivate you to **find the best solutions to very complex technical challenges**? If so, then this job might be the right match for you!

#### The position

We are looking for a **competent and talented Electronics Engineer** for a job in an **exciting international company with a good working environment**. As an Electronics Engineer, you will have the opportunity to **follow the product from sale to delivery**. Our Engineering department is comprised of several teams; yours will be the Electronics team, a well-founded group of 4 colleagues, in a busy and informal working environment characterised by the delivery of products and solutions at a high technical level worldwide.

#### Responsibilities

You will have the overall responsibility of **designing, testing and implementing subsea-, navy- and marine electronics equipment**. Further responsibilities include the **development of electronics on a module and system level**, as well as **software for embedded electronics and user interfaces**. You will be **working very closely** with our **in-house electronics production (PCB/mechatronics) and your colleagues within the Engineering department**.

The area of responsibility will also include the following:

- **Electrical design of control and automation products, using COTS and MacArtney proprietary components**
- **Electronic circuit design**
- **Schematic - and PCB design in OrCAD / PCB Editor**
- **Software development in C (8051/ARM) and C# (GUI)**
- **Participate in project meetings with subsidiaries and customers**
- **Occasional technical support and acceptance test at customer premises**
- **Test and quality control of own as well as pre-designed systems**
- **Keep up to date** with trends and applicable standards within the discipline
- **Meet allocated resource budget**

#### Your profile

You are **driven** and **self-motivated**. You are **pragmatic** and **comfortable in a fast pace environment**. You are a **team player**, **adaptable**, and willing to contribute with a good sense of **humour** to your team. You have a **proactive** approach to your tasks. You take pride in always completing tasks **accurately and correct**. You **thrive in a busy environment** and can **keep track of tasks when it gets hectic**. You have a

Find relevant **QUESTIONS** that may help you understand:

- What are MacArtney's proprietary components and how do they apply them?
- How much do they collaborate globally within the company?
- Who is the target group for the products?

Try to find **ANSWERS**: Start by investigating it yourself. After that, ask other - e.g. your network - or call the company.

**positive** approach to working with customers and colleagues. We emphasise that you are **responsible** and can work **independently**.

#### Your background

- A **Bachelor or a Master's degree in Electronic Engineering, or other relevant education within electronics, automation or software**
- **Practical experience within electronics production and industrial appliance design** will be an advantage
- Minimum **one year of experience** within Electrical design
- Experience with **Electrical design (circuit -, appliance - and system level)**
- Experience with **Software design (embedded, user interface)**
- Experience with **Mechatronic design (enclosure, thermal considerations)**
- Experience with **Printed circuit Board design (leaded/SMD)**
- **English** at a high level, both written and spoken

#### We offer

An exciting position in an **international company** which is characterised by **solid growth and grand ambitions** – and which **has the means and the will to turn ambitions into reality**. We work to a **high professional level, from concept to installation, where there is also room for you to develop through independent tasks with matching responsibility**.

We look forward to receiving your application. Please send it to XXX  
Applications are reviewed and processed on an ongoing basis meaning the vacancy will remain open until a candidate is appointed.  
If you have any questions regarding the position, please contact HR Partner; Doris Bundgaard Nielsen at XXX or by phone XXX or Team Leader; Henrik Søndergård Mathiesen at XXX.  
The position is full-time and located at MacArtney A/S Headquarters in Hjerting, Esbjerg.
