- The course was hard as an ICTE student as Cyber students have significantly more information on the topic. Sometimes it felt like the teacher expected us to know things we hadn't studied before and the lectures were sometimes hard to understand. Especially understanding the lecture slides thoroughly and doing some of the exercises was an area where I put the biggest effort.

- The supervision was really good this semester and the supervisors didn't restrict or try to force our project in a specific direction unlike last semester with Henning as a supervisor. The supervisors guided the project and gave feedback on the report whenever we asked for it, but we still could freely choose what would the direction be for our project.

    It was nice to have some company collaboration with a few Danish companies and I am also happy with our end result in the project.
