

> DeiC visit to AAU March 2023

> **An introduction to DeiC and our services**

## > About DeiC

- > The **collaboration** between the Ministry of Higher Education and Science and the eight universities on the national digital research infrastructure.
- > DeiC **coordinates** the national delivery of
  - Computing resources
  - Data storage and services
  - Network Infrastructure

**Researchers at the Danish universities have access to a digital research infrastructure supporting research and education on a high international level.**

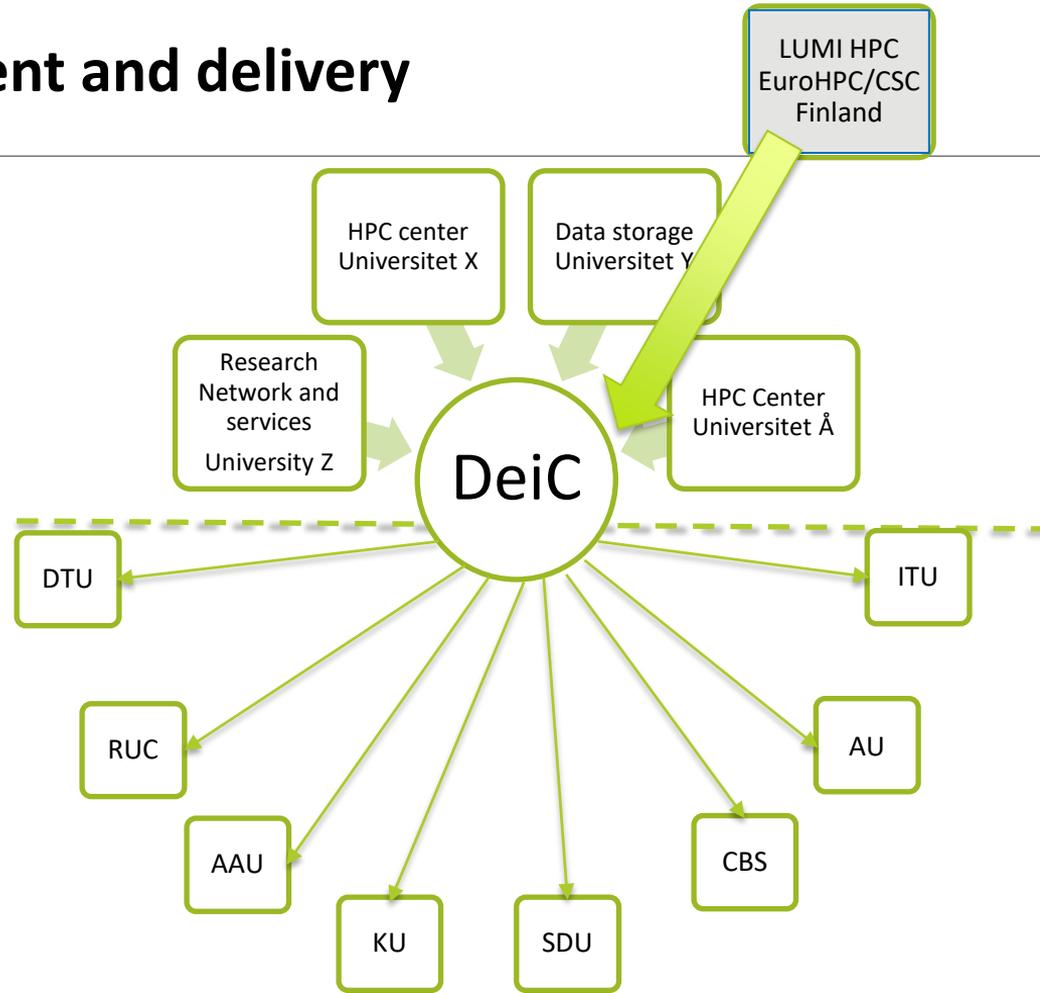

## > Other tasks

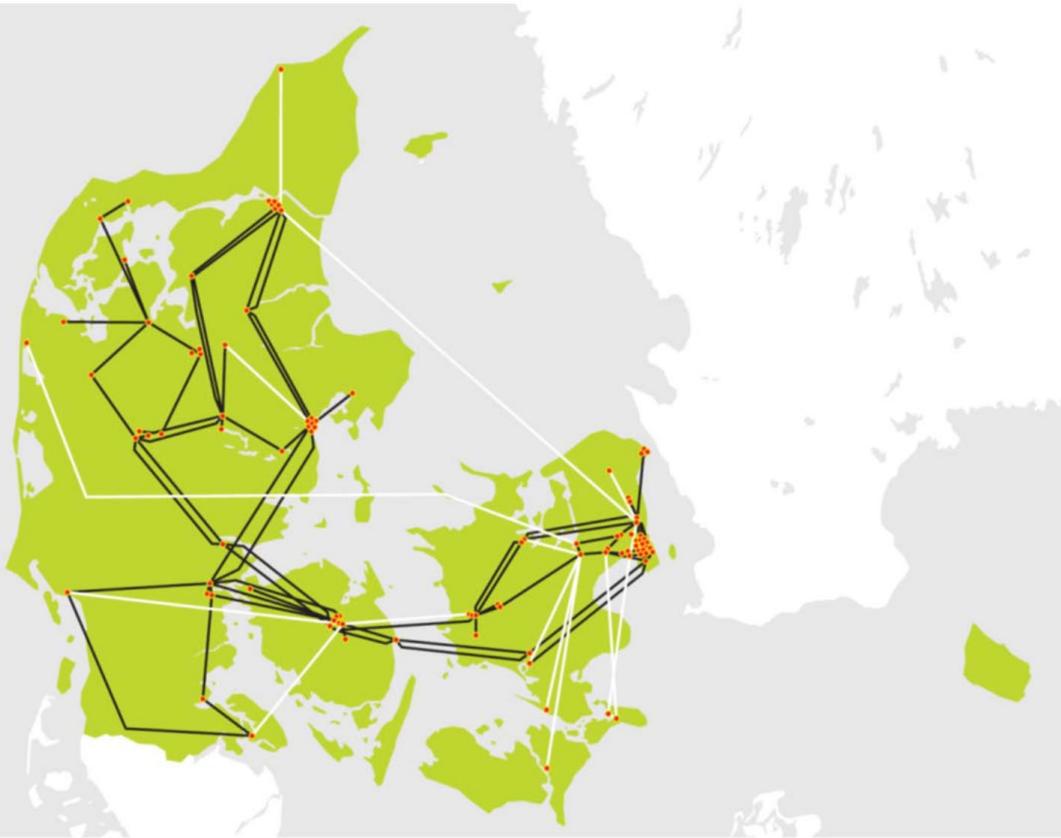

- > Develop and maintain a policy for the handling of research data and coordination of national data management services.
- > Coordinate and participate in national and international collaborations on digital research infrastructure.
- > Advise the Minister of Higher Education and Science on digital research infrastructure matters

## > Coordinator of development and delivery

## > DeIC Forskningsnettet

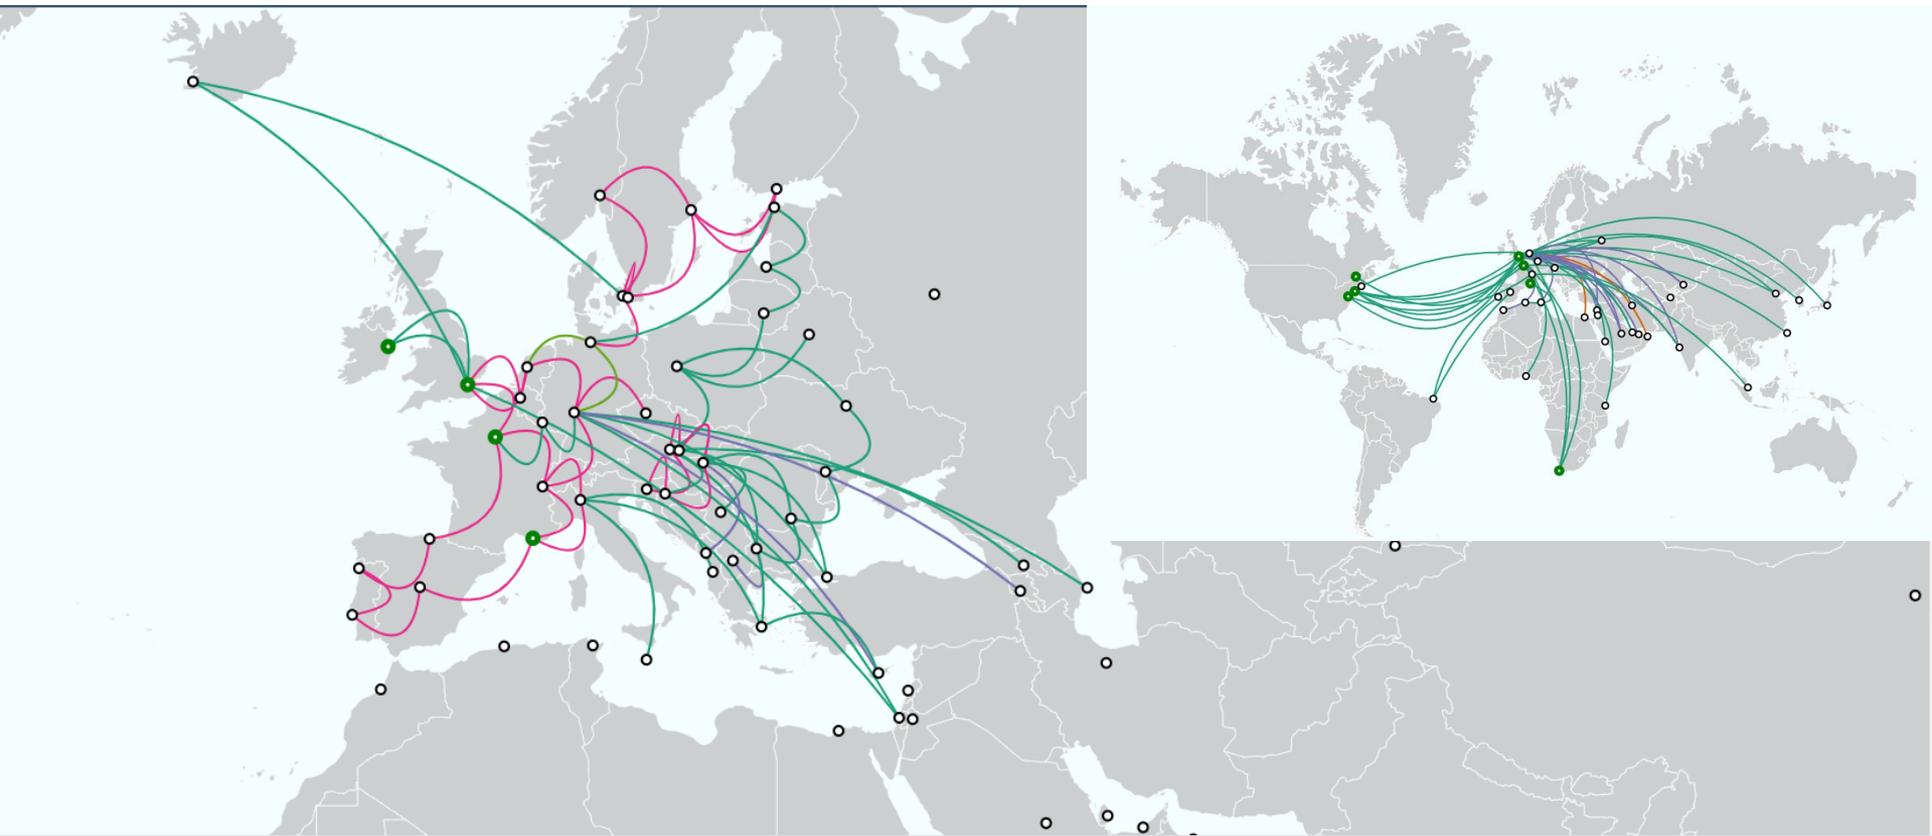

- > 337 locations
  - > 4333 km black fiber
  - > 315 black fiber connections
- 
- > Secure, high speed connections to the whole world through international research networks

## > NORDUnet – connecting the Nordic Research Networks

## > GÉANT – Connecting Europe – and the rest of the world

## > Other Services from DeiC Forskningsnettet

- > eduroam – wifi everywhere
- > WAYF – AAI service
- > FileSender
- > Media and collaborations services
  - Zoom
  - Kaltura
  - Panopto
- > DKCERT – security on the network

## > Data Services and Activities (1)

### DeiC Storage

- > File system like storage
- > Support for project work
  - International partners
- > Special environment for working with sensitive data
- > Accessible from laptop, servers and HPC

### DeiC Dataverse

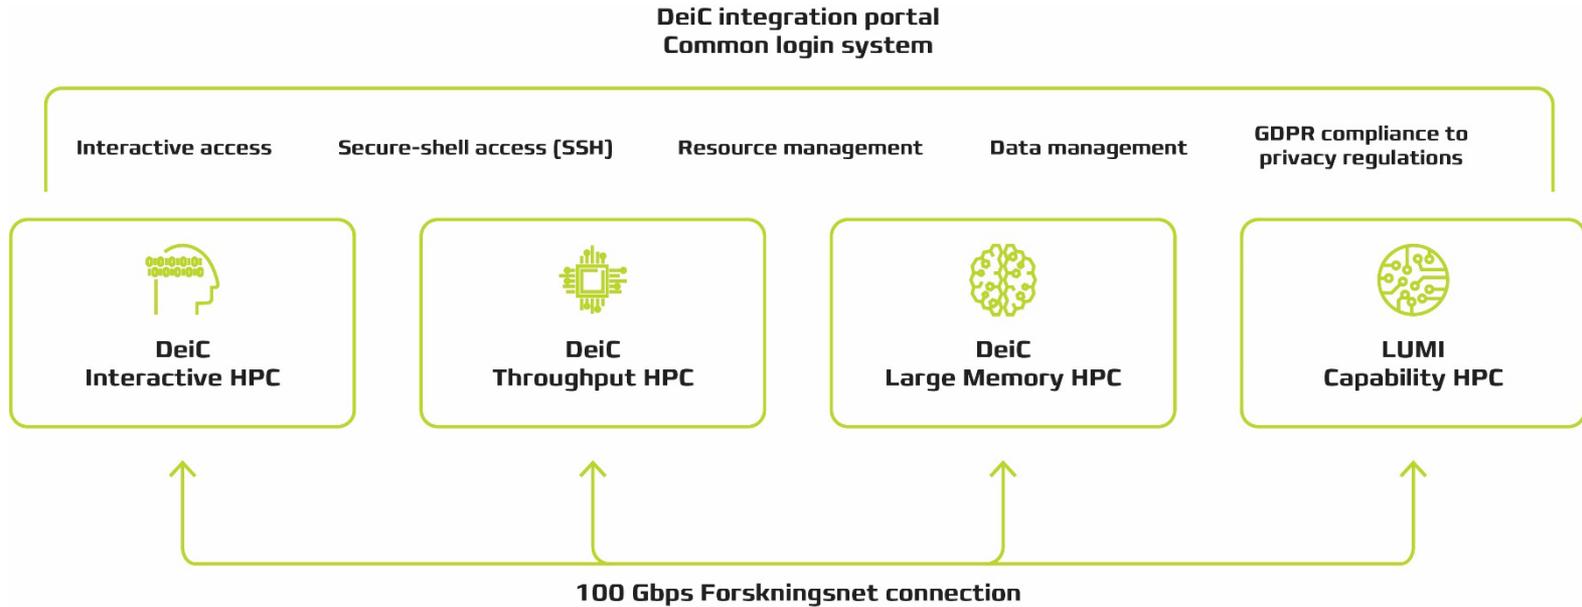

- > Repository for publishing data
- > National repository in a global federation
- > Branding of repositories and collections
  - Institution, Lab, Research area, etc.
- > New tool for existing data stewards
  - Local governance and curation
- > Metadata is searchable (FAIR)
- > Branded repository references to datasets published elsewhere

## > Data Services and Activities

- > DMPonline – helps you create your data management plans
- > DataCite – provides Persistent Identifiers (PID) for your data
- > Coordinating the implementation of the national strategy based on FAIR
- > International engagement:

# > Supercomputers (HPC)

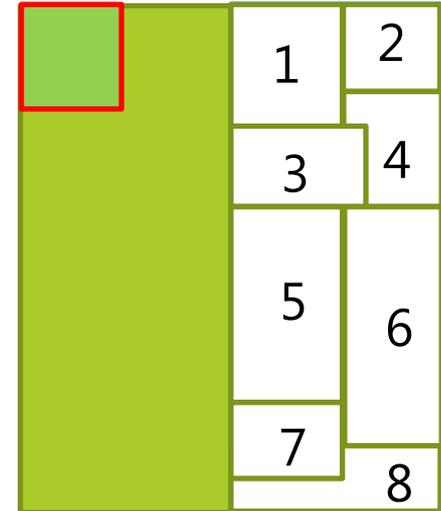

**No matter who you are, no matter where you are – we have the HPC solution for you**

External data transfer  
[SFTP - Secure File Transfer Protocol]

## > Get access

- > AAU share
  - Contact the CLAAUDIA team
- > Apply for national resources
  - Contact the CLAAUDIA team
- > Sand box resources:
  - Test
  - Student projects; bachelor or thesis projects
  - Preparation for applications
- **Contact the CLAAUDIA team**

## > International HPC resources

**EuroHPC**  
Joint Undertaking

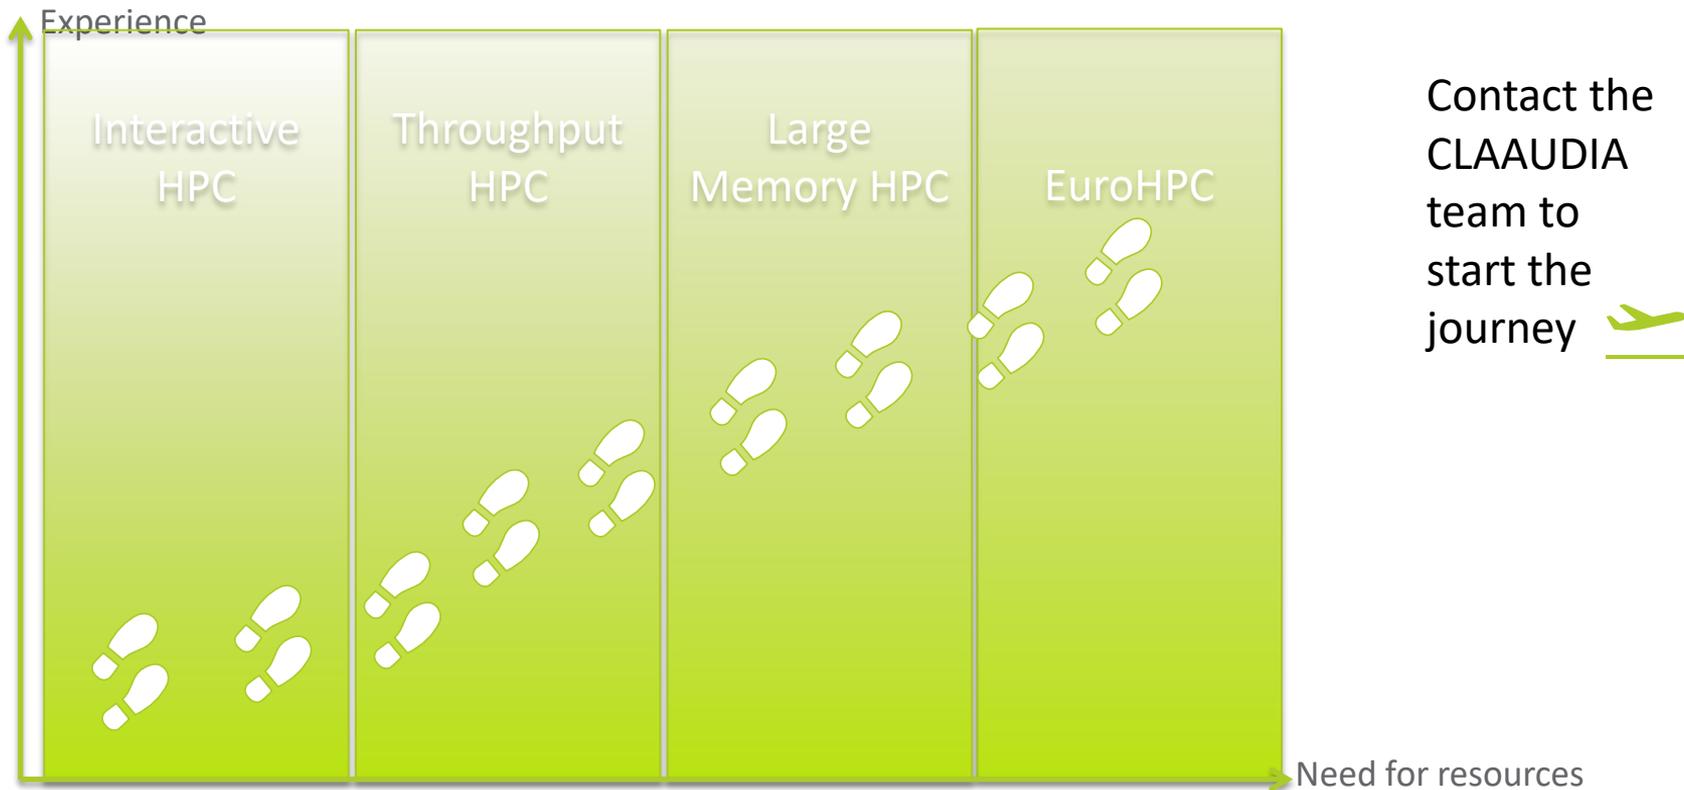

- > **LUMI**  
pre-exascale, Finland.
- > **LEONARDO**  
pre-exascale, Italy.
- > **MARENOSTRUM 5**  
pre-exascale, Spain.
- > **Vega**  
petascale, Slovenia
- > **MELUXINA**  
petascale, Luxembourg
- > **KAROLINA**,  
petascale, Czech Republic
- > **DISCOVERER**  
petascale, Bulgaria
- > **DEUCALION**  
petascale, Portugal
