**Study board conclusions of the semester and teaching evaluation report**

Year: 2021  
Campus Copenhagen  
Semester MED3C  
Coordinator: Sofia Dahl  
Date: April 2022

This document represents the public version of the evaluation of the semester. The document forms together with the semester and teaching evaluation report the basis of any adjustments to the semester's description, planning, execution and/or evaluation of the next iteration of the semester and are used by the coming semester coordinator and semester planning group.

The document also represents the study board's response to the students, teachers, coordinators and other interested parties about possible consequences of conditions that the students of the semester have pointed out.

**The public conclusions and recommendations of the semester coordinator**

In general, the semester went well. Lectures and activities were held on campus, but with additional streaming of lectures via Teams, something that was well appreciated by students. Future coordinators and teachers could consider scheduling with more concentrated IP lectures at the start of semester, so that students are more equipped to work on their projects. It should be clearer to students where to find the study plan relevant for their generation (including the actual description of course learning goals).

**Conclusion of the study board**

The Study Board (MSN) has processed the semester evaluation report and offers the following observations/conclusions:

- The semester evaluation report is incomplete (lacking survey and grade report)
- Student survey response rate: unknown (8 out of 49)
- The Study Board supports the idea of "cramming" important lectures, e.g., Image Processing, into the beginning of the semester, to give students early access to crucial competences needed for the project
