

## Study board conclusions of the study programme evaluation report

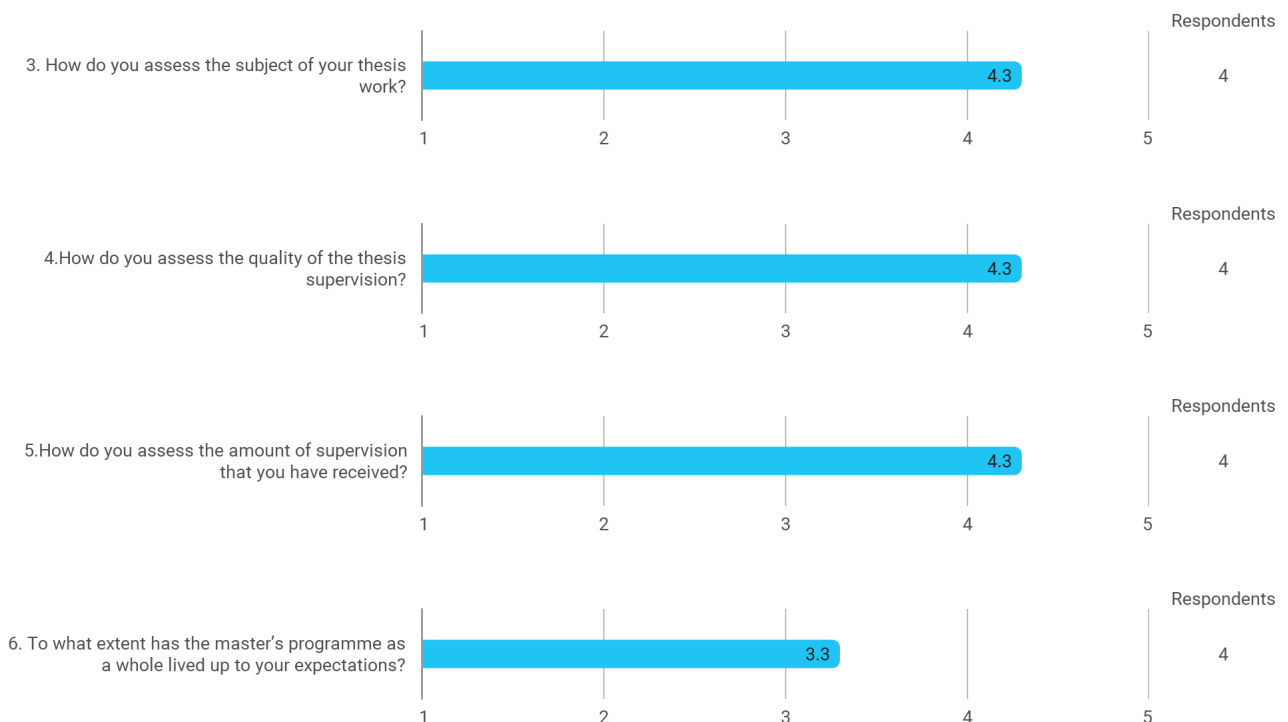

Year: 2021  
Campus: Aalborg  
Semester: ICTE10  
Date: 13 October 2021

This document represents the public version of the evaluation of the abovementioned programme and year and is based on responses from students (at the end of the last semester of the programme) to a questionnaire about their experiences with the contents of the programme, coherence, progression and study load, etc.

The conclusions from the study board (below) represents the board's decision about the adjustments that should be based on the evaluation of the students. The conclusion can include information from semester and teaching evaluations, earlier study programme evaluations and other information from students, teachers, employer panel, etc. known by the study board.

The document also represents the study board's response to graduates, students, teachers and other interested parties about the conclusions made based on the responses of the graduates.

### Summary of the graduate responses

## Conclusion of the study board

The study board has on its meeting on the above data decided that extra focus will be put on the group formation process to avoid as much as possible the stress among the students and give a good start with the project work. This is a recommendation to the coordinators and education group based on the students feedback. Otherwise, the level of the program is assessed to be from average to high and quality of supervision received is assessed as high. The reported average studying load is 30 hours. The number is based on the answers from 4 students and therefore it is unclear whether it is representative.
