

Study board conclusions of the semester and teaching evaluation report

Year:	2019
Campus	Aalborg
Semester	MED5
Coordinator:	Martin Kraus
Date:	May 20, 2020

This document represents the public version of the evaluation of the semester. The document forms together with the semester and teaching evaluation report the basis of any adjustments to the semester's description, planning, execution and/or evaluation of the next iteration of the semester and are used by the coming semester coordinator and semester planning group.

The document also represents the study board's response to the students, teachers, coordinators and other interested parties about possible consequences of conditions that the students of the semester have pointed out.

The public conclusions and recommendations of the semester coordinator

The semester went well with fewer problems than in previous years. However, the noisy work environment is still an unsolved problem. The experience of different project groups appeared to differ more than in previous years. In the future, expectations for the work on specific topics and the exam should be communicated more clearly between supervisors and student groups at the start of the semester.

Conclusion of the study board

The Study Board (MSN) has processed the semester evaluation report and offers the following observations/conclusions:

- Student survey response rate: 38/55 – quite impressive ... survey responses are super valuable in the QA process
- MSN is concerned with noting that student self-reported weekly workload is so low: 69% of students report spending less than 40 hours per week, and 40% spend less than 35 hours per week
- The semester generally appears to have run smoothly
