

## F21 - Study Environment

Study programme	Problem / Wish	Status	Responsible
<b>DIGITAL STUDY ENVIRONMENT</b>			
Several semesters	Guidelines for use of webcam is requested (creates better study environment when camera is turned on)	We will not make guidelines for this as such. It is up to the teacher to determine in the teaching situation if the camera should be turned on.	Department
Several semesters	Better equipment for teachers in connection with online teaching	We have had focus on providing teachers with better equipment during spring 2021 as far as possible.	Department
Several semesters	Satisfied with video material - should be continued after corona	It is up to the teacher if the lectures should be recorded.	Department
SW2-Kbh	Too much info without relevance for students in Copenhagen	A separate News Forum for Cph. to better target communication has now been created.	Study Board
<b>PSYCHOLOGICAL ENVIRONMENT / WELLBEING</b>			
Several semesters	Lack of physical study environment during corona/motivation is very low/misses connection with follow students, friday bars etc.	We have put down a taskforce to work with initiatives on all semesters to promote socializing/well-being after corona. We have received means for the purpose as well. Among other things we have arranged a two-day study start event with the aim of getting students back together again. F-club has started again. Event calendar is posted on cs.aau.dk. The task force working on well-being initiatives also include student club members.	Department

<b>PHYSICAL ENVIRONMENT</b>			
DAT6	Bike sheds around Cassiopeia and NOVI9 is still missing	<p>Has been reported to CAS since spring 2020. Extra sheds has been set up but is still not enough. Message from CAS earlier was they await rent contract negotiations before they initiate further investments.</p> <p>We have followed up again in September 2021. CAS reports they now have plans to set up more and will inform what status is.</p>	CAS
Several semesters	More water coolers/dispensers at Cassiopeia	Water coolers/dispensers outside 0.2.90 and 0.195 will be set up	CAS
