#### A: If you press 'Save and Close'

The timecard is now saved, but it is still possible to edit your entry, add hours or register time on other projects. It is possible to make your registrations on a daily basis, by looking up the timecard again.

If you need to delete your saved timecard, this can be done by pressing '**Actions'** and selecting '**Delete'**. Note that only saved and unsubmitted timecards can be deleted.

## B: If you press 'Submit'

The timecard is given the status **'Submitted'**. If you after submitting your timecard need to make changes, you must ask an approver to change the status of your timecard so it gets the status '**Saved'**. Your timecard is then editable, and you can access the timecard again and change or add dates, hours etc.

If your submitted timecard has been approved, your approver similarly needs to send the timecard back to you. Then you can then change or add something to the timecard.
