

### Study board conclusions of the semester and teaching evaluation report

Year:	2019
Campus	Copenhagen
Semester	SMC7
Coordinator:	Stefania Serafin
Date:	May 20, 2020

This document represents the public version of the evaluation of the semester. The document forms together with the semester and teaching evaluation report the basis of any adjustments to the semester's description, planning, execution and/or evaluation of the next iteration of the semester and are used by the coming semester coordinator and semester planning group.

The document also represents the study board's response to the students, teachers, coordinators and other interested parties about possible consequences of conditions that the students of the semester have pointed out.

### The public conclusions and recommendations of the semester coordinator

The semester went pretty well and had a number of motivated and challenged students.

The students like the diversity of SMC topics, but in the future more time should be spent to structure their learning and prepare them for group work.

### Conclusion of the study board

The Study Board (MSN) has processed the semester evaluation report and offers the following observations/conclusions:

- Student survey response rate: 10/27 – not too impressive ... perhaps next year it will be possible to make sure that responding to survey is made an element in the semester startup in the following semester (SMC8)
- The semester appears to have run very smoothly with positive evaluations from students on all modules and great performance from students on the project exams
- The introduction of students with a non-AAU B.Sc. background into our M.Sc. programs is still a challenge; a challenge that the small PBL course is not nearly able to lift
