

Study board conclusions of the semester and teaching evaluation report

Year: 2019
Campus: Aalborg
Semester: MED3
Coordinator: Mohammad Naser Sabet Jahromi
Date:

This document represents the public version of the evaluation of the semester. The document forms together with the semester and teaching evaluation report the basis of any adjustments to the semester's description, planning, execution and/or evaluation of the next iteration of the semester and are used by the coming semester coordinator and semester planning group.

The document also represents the study board's response to the students, teachers, coordinators and other interested parties about possible consequences of conditions that the students of the semester have pointed out.

The public conclusions and recommendations of the semester coordinator

Overall, the semester went well and students were satisfied with it – except for students who chose to express his or her strong dissatisfaction with the HSP course. The project topics and supervision was good. The organization and information about status seminar from the semester coordinator were not good and differed from previous semester. The noise level and windows blind in the group area were also a problem. Moreover, the lab equipment access and funding application resulted in the problem as well.

Conclusion of the study board

The Study Board (MSN) has processed the semester evaluation report and offers the following observations/conclusions:

- Student survey response rate: 36/55 – quite impressive ... survey responses are super valuable
- MSN is very concerned with the students' evaluation of the Human Senses and Perception course. MSN has informed the department of this fact and steps have been taken to make sure next year's installment of the course will systematically and thoroughly address this feedback aiming at providing a much better learning experience
